PUBLICATIONS ON RADIOFREQUENCIES AND HEALTH

Anderson V, Joyner KH (1995): **Specific absorption rate levels measured in a phantom head exposed to radio frequency transmissions from analog hand-held mobile phones.** Bioelectromagnetics 16:60-9.

Australian Dept. of Health (May 1997): Information sheets. Health issues and electromagnetic energy from mobile phone towers.

Beard BB, Kainz W. Review and standardization of cell phone exposure calculations using the SAM phantom and anatomically correct models. BioMedical Engineering OnLine 2004;3:34, Oct 13 (Epub ahead of print). The article can be found at www.biomedical-engineering-online.com/content/3/1/34

Boice JD, McLaughlin JK. Epidemiologic studies of cellular telephones and cancer risk - a review. Swedish Radiation Protection Authority, 2002.

Calabrese P, Spittler JF, Gehlen W (1997): Neuropsychological performance of healthy subjects under low frequency pulsed RF fields. 2nd World Congress for Electricity and Magnetism in Biology and Medicine, Bologna, Italy.

Dasdag S, Akdag MZ, Aksen F, Yilmaz F et al. (2003): **Whole body exposure of rats to microwaves emitted from a cell phone does not affect the testes**. Bioelectromagnetics 24:182-188.

De Seze R et al. (1998): **GSM radiocellular telephones do not disturb the secretion of antepituitary hormones in humans**. Bioelectromagnetics 19:271-278.

Dec S, Cieslak E, Miszczak JS. (1997): Electroencephalographic frequency mapping in healthy subjects during cellular head telephone stimulation. 2nd World Congress for Electricity and Magnetism in Biology and Medicine, Bologna, Italy.

European Committee for Electrotechnical Standardization (CENELEC) (1995): Human exposure to Electromagnetic fields high frequency (10 kHz to 300 GHz). European Prestandard prepared by the European Committee for Electrotechnical Standardization.

Goldstein BD (2001): The precautionary principle also applies to public health actions. AJPH 91:1358-1361.

Hietanen M, Kovala T, Hamalainen A-M et al. (1997): EEG activity of the human brain during exposure to cellular phones. 2nd World Congress for Electricity and Magnetism in Biology and Medicine, Bologna, Italy.

Kimata H (2005): Microwave radiation from cellular phones increases allergen-specific IgE production. Allergy 60:838-9

Kues HA, D'Anna SA, Oslander R, Green WR, et al. (1999): **Absence of ocular effects after either single or repeated exposure to 10 mW/cm² from a 60GHz CW source.** Bioelectromagnetics 20:463-473.

Spittler JF, Calabrese P, Gehlen W (1997): Cerebro-biological effects in low frequency pulsed RF fields. 2nd World Congress for Electricity and Magnetism in Biology and Medicine, Bologna, Italy.

Thimonier C, Chabert R, Ayoub J et al. (1997): No effect in humans of microwaves emitted by GSM mobile telephones on the auditory brainstem responses and auditory distortion products. 2nd World Congress for Electricity and Magnetism in Biology and Medicine, Bologna, Italy.

Thuroczy G, Kuninyi G, Sinay H, Bakos J et al. (1997): Human studies on potential influence of RF exposure emitted by GSM cellular phones on cerebral circulation and EEG. 2nd World Congress for Electricity and Magnetism in Biology and Medicine, Bologna, Italy.

Whitehead T, Moros EG, Brownstein BH, Roti Roti JL (2006b): The number of genes changing expression after chronic exposure to code division multiple access or frequency DMA radiofrequency radiation does not exceed the false-positive rate. Proteomics 6:4739-44.
